

TechTurkuAi @ Turku ICT^{AI} Week

AI Software Basics bootcamp – Potkuri 4 & 8.3 2019

Registration: <https://www.lyyti.in/AIBasicsICTWeek>

Assistant professor Alexander Jung from Aalto university- Machine learning expert

The bootcamp will focus on the methods of ML and AI and not the tools, i.e., i can prepare the bootcamp using Python (very convenient high-level language which many consider the de-facto-standard in machine learning research/industry) or try to get along with Excel spreadsheets (yes, one can do machine learning in excel).

- How to formulate your business application as a Machine Learning Problem?
- How to determine which algorithm to use for your problem?
- How to apply basic ML algorithm to your problem?
- How to validate a ML algorithm?

No fees for attending, lunch is not included.

 **TURKU SCIENCE PARK Oy Ltd**

Vipuvoimaa
EU:lta
2014–2020

Program 4.3.2019

09.00-09.30 Coffee and presentations
09.30-11.30 Get to know machine learning
11.30-12.00 Lunch (at own cost)
12.30-14.00 Machine learning continues
14.00-14.30 Coffee and roundup
14.30-17.00 Continue your own work

Program 8.3.2019

09.00-09.15 Coffee
09.30-11.30 Machine learning continues
11.30-12.00 Lunch (at own cost)
12.30-14.00 Machine learning continues
14.00-14.30 Coffee and course roundup
14.30-17.00 MatLab, Wolfram and other demos

More info

Michael Lindholm, phone 050 505 0089 or michael.lindholm@turkubusinessregion.com

Markku Oksman, phone 050 3131042 or markku.oksman@yrityssalo.fi

For whom? These lessons are aimed for the technically interested. We will talk about AI in general as well as about the principals of machine learning programmed with Python and with Excel. You do not need deep skills in coding with Python to attend.
How many seats? A max of 50 persons can attend. At the most two persons from the same company.
