

SAP Analytics Cloud : self-service BI, planning and smart insights in one place.

#RACE2025 Workshop - on Tue 7th May 2019

Goals and Content

You will hear about a governance approach for self service BI, allowing you to position SAC in your analytics landscape.

Hands-on exercises for creating a model that is planning enabled. Leverage smart insights (powered by machine learning) and test the planning / forecasting capabilities.

Prerequisites

You need to bring your own laptop with Chrome browser (mandatory), Excel (recommended not mandatory) and PDF reader.

Target Audience

This workshop is intended for applications managers, product owners, architects, business analysts interested in self service BI and Analytics cloud.

Trainers

Workshop is organized by IBM Finland and trainers are

Pedro Lima

Miguel Peredo Zurcher
